

Terrasoft®

Vase Flora

Simple and elegant in design, sophisticated and functional in the material - these features characterise the Terrasoft plant pot, flora. Even smaller plant arrangements are beautifully presented - especially on balconies or in entrance areas. In the colours metallic and silver grey the vases have a metallic shimmer, so that they look very noble.

Made completely of pure rubber granulate, the plants can be brought frost-free through the winter. In the summer flora impresses with its UV-resistance. A recess in the inner pot prevents waterlogging.

ADVANTAGES

- small dimension
- stylish
- UV resistant
- weather resistant
- insulating: the plants are also protected in the winter months
- high stability
- shatterproof: Rubber granulate adapts to the weather
- including inner pot

APPLICATION
